Hi Stephanie --

Yes, you are right that Curtis McHaley is no longer with Molzen-Corbin & Associates. Del Archuleta is the project manager on the project and he has given me some update info for you.

We (Molzen-Corbin) have completed the technical section of PER for the project. The EID has been started; however, we are awaiting some guidance from Ruidoso and Ruidoso Downs before it can go much further. The EID will be authored by John Taschek of Taschek & Associates. For your information, his telephone number is 821-4700. He will be coordinating the EID portion with you. I will forward this e-mail to him so that he is aware that you are the project manager on the project for NMED and so that he receives your attachments.

Would you like a copy of the PER now prior to the EID or would you prefer to wait until the EID is complete? We can certainly do whatever you would prefer.

Thanks, Stephanie!

Ms. Mohler, I was working with Curtis McHaley on the Ruidoso wastewater treatment plant. I understand that Curtis is no longer employed with Molzen and need to be put in contact with the appropriate person for this project.

I spoke with Steve Baumgarn of the NMED Surface Water Quality Bureau and he informed me that Molzen has completed a preliminary engineering report (PER) for wastewater treatment plant alternatives and is currently working on the environmental information document (EID). I'm sure Molzen is aware of the NEPA policy that must be followed when federal funding is involved, since you all have worked with Construction programs bureau before on this particular EPA STAG grants. However, I have attached the NEPA policy and EID format that I request Molzen to use, since I am administering this project for EPA.

Please let me know where we are at with this project and have the appropriate project engineer send the PER and EID for my review and approval.

Thank you.
Stephanie DuBois
